Art Unit: 2765

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

I. Claims 1-36, 41, 42, 45, 47-61, drawn to a system for providing to a user advertising on a hypertext network, classified in class 705, subclass 26.

II. Claims 37-39, and 62, drawn to a method of preregistering user purchaser information, classified in class 705, subclass 14.

2. The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention II has separate utility such as storing an electronic coupon wherein said advertisement is selected by a user and redeeming said electronic coupon during a secure purchase transaction at the request of a user without hypertext. See MPEP § 806.05(d).

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Art Unit: 2765

3. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

4. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
